

# Bangor Region Chamber of Commerce

**A REGION IN MOTION**

## EARLY BIRD BREAKFAST

### Imagine – Bio-Medical Research in the Bangor Region

**Dr. Janet M. Hock, BDS, PhD**

Director of the Maine Institute for Human Genetics and Health

- **Imagine** world class geneticists and other bio-scientists working in a biotech hub right in the Bangor / Brewer Region.
- **Imagine** combining the clinical expertise of Eastern Maine Medical Center, the world class bench research of Jackson Laboratory and the academic pursuits of the University of Maine’s Graduate School of Biomedical Science.
- **Imagine no longer.** The Maine Institute for Human Genetics and Health, a subsidiary of EMHS, is now conducting translational research (from the bench to patient care) on cancer, bone and the brain. MIHGH has a special emphasis on studying human tissues linked to clinical, family and demographic data and merged with geographic data on environmental risks in rural Maine. The goal is to find solutions to cancer, and be a catalyst for an emerging biotech economy in the region.

**November 19, 2008 – 7:30 am**

Spectacular Event Center  
395 Griffin Rd, Bangor

*The Bangor Region Chamber of Commerce Governmental Affairs in conjunction with the:*
